Izmir Turkey

Microservice Architecture, Backend Web Development,
Object Oriented Design, Agile Methodologies, API
Development, .NET Core, Unit Testing, TypeScript, JavaScript,
Node.js, SQL, Python, Azure, AWS, Git

I'm a Lead Software Engineer with 10+ years of experience building scalable backend systems and microservice architectures in travel-tech, e-commerce, and enterprise domains. Experienced in leading cross-functional engineering teams, driving technical decision-making, and delivering fault-tolerant distributed systems using .NET, cloud technologies, and event-driven architectures. Strong background in system design, code quality, and mentoring engineers in agile environments.

EXPERIENCE

Lead Software Engineer, C Teleport

Apr 2024 - Ongoing, Remote

C Teleport is a travel agency to empower people through a flexible online travel management experience that is easy to use. My daily responsibilities are;

- Lead the technical development and execution of projects within the team
- Break down business requirements into technical tasks and implementation plans
- Drive the planning, prioritization, and execution of development tasks
- Identify and resolve technical risks, bottlenecks, and system issues
- Ensure project deliverables are completed on time and meet quality expectations
- Act as a technical point of contact for the team and stakeholders
- Hands-on contributor for complex features and critical production issues

Senior Software Engineer, C Teleport

Aug 2023 - Apr 2024, Remote

- Enhance, maintain, and document our microservices according to functional and nonfunctional requirements
- .NET Core, PostgreSQL, MongoDB, RabbitMQ, Redis

Backend Team Lead, ÇiçekSepeti / Mizu

Jan 2022 - Apr 2023, Remote

CicekSepeti is the most visited floral and gifting website that serves in Turkey, Spain, Mexico and Colombia. As a backend team lead & senior software developer I'm responsible for implementing, reviewing microservices, and guiding team mates. My daily responsibilities are;

- Mentoring and guiding team members (includes tech and non-tech roles)
- Designing scalable microservice solutions based on business and user requirements
- Creating and documenting our microservice inventory
- Reporting the optimisation of inner processes and errors to the software development managers
- Worked on high-traffic e-commerce systems serving millions of users

Senior Software Developer, ÇiçekSepeti / Mizu

Dec 2020 - Apr 2023, Remote

- Enhance and maintain our microservices according to functional and nonfunctional requirements
- Documenting functional and technical requirements
- Conducting the analysis with business analyst to determine the user needs
- .NET Core, TypeScript, NodeJS, Python, RabbitMQ, Redis, MySQL, MSSQL, AWS S3, AWS Lambda

Software Developer, Emakina

Nov 2016 - Oct 2020, Izmir, Turkey

Emakina is the user agency that serves all around the world. As a software developer I work with multinational agile and customer teams and use various CMS like Sitecore and Sitefinity. My daily responsibilities are;

- Enhance and maintain our clients CMS systems
- Participating in feature demos, technical and functional analysis
- Documenting functional and technical requirements
- .NET MVC, Javascript, Sitecore, Sitefinity, Azure, MsSQL
- Delivered solutions for clients including Sunweb, Kodak Alaris, Philip Morris International, and Nationale Loterij

Software Developer & Data Security Consultant, Komtaş

Jul 2015 - Oct 2016, Istanbul, Turkey

Komtaş empowers clients' digital transformation journey by driving data and analytics into the core of the client business. As a software developer and consultant I was working onsite in a client environment. My responsibilities are;

- Implementing bash scripts & software plugins that work with Informatica services to bind customer environments to the Informatica platforms
- Participating in pre-sales technical activities for Vodafone and Garanti BBVA Bank
- Delivered solutions for clients including Turkcell, KuveyTurk Bank
- Java, Informatica DDM, Informatica PowerCenter, Informatica DQ, Oracle, MSSQL, Teradata

EDUCATION

- BSc, Computer Engineering — İzmir Institute of Technology

Oct 2010 - June 2015, Izmir, Turkey
